Commitment and partnership
within a global organization.

Specialized in logistics end-
to-close encounter with
exporters which accompany
the delivery date of goods at
the port, airport and
warehouse.

SEA & AIR

- Intelligent multimodal that aims freight costs reduction and final import competitiveness increase, optimizing time x costs.
- The origin can be of any point of the world where there are route options to any destination in Brazil.

Receipt of Goods

Whenever a product is received in our warehouse, we have total control of it.

Thus, the importer can monitor package condition in order shipment can be loaded safely and intact. This way, importer is notified by photos in order to minimize possible damages in the shipment.

In our warehouses, stock control is the adopted procedure to register, manage and supervise goods incoming and outgoing.

WAREHOUSE

Define strategies and grants quality, always seeking for costs reduction and repacking service improvement, as well shipment plan both air and sea.

BE OUR BUSINESS PARTNER.
